50X1-HUM

1. In the motor factory of Rakovica, prototypes of three different tractors have been constructed and tested. When mass production is begun, they will be distributed to cooperative farms.
2. All the tractors have the same motor, a 6-cylinder, 4-cycle, gasoline-burning engine which develops 50 horsepower at 2,000 revolutions per minute. There are three forward speeds and one reverse. One model, which has a speed of eight and one half kilometers an hour, is equipped with rubber tires for average agricultural work.
3. A second model, with the same speed, is equipped with metal wheels for work in soft ground while the third model, which is used for towing loads of from five to seven tons, has a top speed of 25 kilometers per hour and a special cab for the driver.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
